Subject Index

Analytical Techniques, Chemical

Composition of butadiene-styrene copolymers prepared by emulsion polymerization, E. J. Meehan, 318

Determination of catalyst fragments in polymers by absorption in the ultraviolet, Letter to the Editor, A. Katchalsky and H. Wechsler, 229

Determination of persulfate in emulsion polymerization latices, I. M. Kolthoff, L. S. Guss, D. R. May, and A. I. Medalia, 340

Determination of polystyrene in GR-S rubber, I. M. Kolthoff, T. S. Lee, and C. W. Carr, 429

Experimental study of copolymerization, T. Alfrey, Jr., E. Merz, and H. Mark, 37

Mechanism of vinyl polymerizations. VIII. Introduction of foreign end groups, C. C. Price and D. H. Read, 44

Modern views on the chemistry of vulcanization changes. I. Nature of the reaction between sulfur and olefins, E. H. Farmer and F. W. Shipley, 293

Modern views on the chemistry of vulcanization changes. II. Role of hydrogen sulfide, R. F. Naylor, 305

Modern views on the chemistry of vulcanization changes. III. Reaction of sulfur with squalene and with rubber, G. F. Bloomfield, 312

Analytical Techniques, Physical

Application of the density-gradient tube in fiber research, Letter to the Editor, S. Tessler, N. T. Woodberry, and H. Mark, 437

Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63

Comparison of ultraviolet absorption and chlorine analysis methods for composition of butadiene-*p*-chlorostyrene copolymers, E. J. Meehan, T. D. Parks, and H. A. Laitinen, 247

Density of cellulose fibers. I. Introduction and experiments on the penetration of liquids into dry cellulose, P. H. Hermans and D. Vermaas, 149

Density of cellulose fibers. II. Density and refractivity of model filaments, P. H. Hermans, J. J. Hermans, and D. Vermaas, 156

Density of cellulose fibers. III. Density and refractivity of natural fibers and rayon, P. H. Hermans, J. J. Hermans, and D. Vermaas, 162

Determination of polymer-liquid interaction by swelling measurements, P. M. Doty and H. S. Zable, 90

Elastic deformation and molecular weight in polyisobutylene, J. Rehner, Jr., 225

Mechanism of peroxide-initiated styrene polymerization. Infrared absorption of some polymer samples, H. F. Pfann, V. Z. Williams, and H. Mark, 14

Silver dichroism of micellar systems with fibrous structures, A. Frey-Wyssling and O. Wälchli, 266

Spectrophotometric determination of the styrene content of butadiene-styrene copolymers, E. J. Meehan, 175

Technique of electron-microscope investigation of fiber surfaces, S. F. Kern, 259

Use of density-gradient tube in the study of high polymers, R. F. Boyer, R. S. Spencer, and R. M. Wiley, 249

Use of a stopcock device for sampling latex, A. I. Medalia, 245

Cellulose and Cellulose Derivatives

The Baker-Philippoff equation for cellulose acetate solutions, J. L. Riley, 434

β-Aminoethoxyl- and β-cyanoethoxylcellulose acetates, T. S. Gardner, 289

Cellulose acetate esters containing amino nitrogen, T. S. Gardner, 121

Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63

Deformation mechanism of cellulose gels. I. Present status of problem, P. H. Hermans, 389

Deformation mechanism of cellulose gels. II. Course of crystallite orientation compared to that required by Kratky's theory, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 393

Density of cellulose fibers. I. Introduction and experiments on the penetration of liquids into dry cellulose, P. H. Hermans and D. Vermaas, 149

Density of cellulose fibers. II. Density and refractivity of model filaments, P. H. Hermans, J. J. Hermans, and D. Vermaas, 156

Density of cellulose fibers. III. Density and refractivity of natural fibers and rayon, P. H. Hermans, J. J. Hermans, and D. Vermaas, 162

The photochemical decomposition of cellulose acetate-butyrate, R. L. Tichenor, 217

Sedimentation and diffusion of cellulose molecules, J. J. Hermans, 233

Submicroscopic structure of cellulose gels, A. Frey-Wyssling and K. Mühlethaler, 172

Degradation
The photochemical decomposition of cellulose acetate-butyrate, R. L. Tichenor, 217

Elasticity and Elastic Deformation
Determination of polymer-liquid interaction by swelling measurements, P. M. Doty and H. S. Zable, 90
Elastic deformation and molecular weight in polyisobutylene, J. Rehner, Jr., 225
Molecular processes during deformation of rubberlike elastic bodies, K. H. Meyer and A. J. A. van der Wyk, 49
A new approach to the theory of rubberlike elasticity, M. L. Huggins, 1

Electron Microscopy
Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63
Technique of electron-microscope investigation of fiber surfaces, S. F. Kern, 259

Gelation
New method for determination of the activation energy for the gelation of silicic acid solutions, S. S. Penner, 441

Mechanical Properties
Deformation mechanism of cellulose gels. I. Present status of problem, P. H. Hermans, 389
Deformation mechanism of cellulose gels. II. Course of crystallite orientation compared to that required by Kratky's theory, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 393
Elastic properties of textile yarns, represented with the aid of a mechanical model, H. A. Vreedenberg, 329
The mechanism of reinforcement. Part II, G. Goldfinger, 58
Molecular processes during deformation of rubberlike elastic bodies. K. H. Meyer and A. J. A. van der Wyk, 49
A new approach to the theory of rubberlike elasticity, M. L. Huggins, 1
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22
Theory of rolling plastics. I. Calculation of roll pressure, D. D. Eley, 529
Theory of rolling plastics. II. Thermal effects, D. D. Eley, 535

Molecular Structure and Shape
Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63
Dependence of the average transversal on the longitudinal dimensions of statistical coils formed by chain molecules, W. Kuhn, 380
Nature of the carbonyl groups in polyvinyl alcohol, J. T. Clarke and E. R. Blout, 419
A new approach to the theory of rubberlike elasticity, M. L. Huggins, 1
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22
Polymerization of methyl methacrylate in aqueous emulsions, J. H. Baxendale, M. G. Evans, and J. K. Kilham, 466
Statistical behavior of the single chain molecule and its relation to the statistical behavior of assemblies consisting of many chain molecules, W. Kuhn and F. Grün, 183

Molecular Weights
Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63
Elastic deformation and molecular weight in polyisobutylene, J. Rehner, Jr., 225
Molecular weight averages obtained from sedimentation velocity and diffusion measurements, S. Singer, 445
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22
Relation between molecular weight and intrinsic viscosity for polymethyl methacrylate, J. H. Baxendale, S. Bywater, and M. G. Evans, 237

Polymerization
Comparison of ultraviolet absorption and chlorine analysis methods for composition of butadiene-*p*-chlorostyrene copolymers, E. J. Meehan, T. D. Parks, and H. A. Laitinen, 427
Composition of butadiene-styrene copolymers prepared by emulsion polymerization, E. J. Meehan, 318
Determination of catalyst fragments in polymers by absorption in the ultraviolet. Letter to the Editor, A. Katchalsky and H. Wechsler, 229
Experimental study of copolymerization, T. Alfrey, Jr., E. Merz, and H. Mark, 37
Intramolecular reactions in vinyl polymers as a means of investigation of the propagation step, E. Merz, T. Alfrey, Jr., and G. Goldfinger, 75
Heat polymerization of nonconjugated vegetable oils, I. M. Bernstein, 495
Mechanism of peroxide-initiated styrene polymerization. Infrared absorption of some polymer samples, H. F. Pfann, V. Z. Williams, and H. Mark, 14

Mechanism of vinyl polymerizations. VIII. Introduction of foreign end groups, C. C. Price and D. H. Read, 44
Mechanism of vinyl polymerizations. IX. Some factors affecting copolymerization, C. C. Price, 83
Polymerization of allyl methacrylate by means of ultraviolet radiation, Letter to the Editor, E. R. Blout and B. E. Ostberg, 230
Polymerization of methyl methacrylate in aqueous emulsions, J. H. Baxendale, M. G. Evans, and J. K. Kilham, 466
Polymerization of olefins and diolefins in suspension and emulsion. Part I, W. P. Hohenstein and H. Mark, 127
Polymerization of olefins and diolefins in suspension and emulsion. Part II, W. P. Hohenstein and H. Mark, 549
Preparation and properties of rubberlike high polymers. I. Polymerization of dienes and vinyl compounds in bulk, C. Koningsberger and G. Salomon, 200
Preparation and properties of rubberlike high polymers. II. Polymerization of mixtures in bulk, C. Koningsberger and G. Salomon, 353
Preparation and properties of rubberlike high polymers. III. Polymerization of mixtures in emulsion, G. Salomon and C. Koningsberger, 364
Preparation, purification, and polymerization of diethyl silicon dichloride, T. Alfrey, Jr., F. J. Honn, and H. Mark, 102
Reaction of benzoyl peroxide with cyclohexane and cyclohexene. Contribution to the mechanism of the catalyzing action of peroxides in the polymerization of vinyl derivatives, P. H. Hermans and J. Van Eyk, 407
Reactivity of monomers in copolymerization, K. Nozaki, 455
Sodium-catalyzed copolymerization of 1,3-butadiene and styrene, C. S. Marvel, W. J. Bailey, and G. E. Inskeep, 275
Symbols for copolymerization, Letter to the Editor, T. Alfrey, Jr., F. J. Honn, and H. Mark, 581

Proteins

Dependence of solvation on particle shape, B. Jirgensons, 475
Investigation of potato proteins, B. Jirgensons, 484
Mechanism of vinyl polymerizations. VIII. Introduction of foreign end groups, C. C. Price and D. H. Read, 44
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22

Radiation and Spectroscopy

Comparison of ultraviolet absorption and chlorine analysis methods for composition of butadiene-*p*-chlorostyrene copolymers, E. J. Meehan, T. D. Parks, and H. A. Laitinen, 247
Determination of catalyst fragments in polymers by absorption in the ultraviolet, Letter to the Editor, A. Katchalsky and H. Wechsler, 229
Mechanism of peroxide-initiated styrene polymerization. Infrared absorption of some polymer samples, H. F. Pfann, V. Z. Williams, and H. Mark, 14
The photochemical decomposition of cellulose acetate-butyrate, R. L. Tichenor, 217
Polymerization of allyl methacrylate by means of ultraviolet radiation, Letter to the Editor, E. R. Blout and B. E. Ostberg, 230
Spectrophotometric determination of the styrene content of butadiene-styrene copolymers, E. J. Meehan, 175

Reactions of Polymers

Intramolecular reactions in vinyl polymers as a means of investigation of the propagation step, E. Merz, T. Alfrey, Jr., and G. Goldfinger, 75
Water-soluble alkoxyacetals of polyvinyl alcohol, K. F. Beal and C. J. B. Thor, 540

Reviews

Advances in colloid science. Volume II. Scientific progress in the field of rubber and synthetic elastomers, H. Mark and G. S. Whitby, 582
Advancing fronts in chemistry. Volume I. High polymers, S. B. Twiss, 440
On the structure of the protein molecule. A chemical investigation, N. Troensegaard, 232
Studies on nitrocellulose. Including the construction of an osmotic balance, I. Jullander, 146

Rubber

Determination of persulfate in emulsion polymerization latices, I. M. Kolthoff, L. S. Guss, D. R. May, and A. I. Medalia, 340
Determination of polystyrene in GR-S rubber, I. M. Kolthoff, T. S. Lee, and C. W. Carr, 429
The mechanism of reinforcement. Part II, G. Goldfinger, 58
Molecular processes during deformation of rubberlike elastic bodies, K. H. Meyer and A. J. A. van der Wyk, 49
Modern views on the chemistry of vulcanization changes. I. Nature of the reaction between sulfur and olefins, E. H. Farmer and F. W. Shipley, 293
Modern views on the chemistry of vulcanization

changes. II. Role of hydrogen sulfide, R. F. Naylor, 305
Modern views on the chemistry of vulcanization changes. III. Reaction of sulfur with squalene and with rubber, G. F. Bloomfield, 312
A new approach to the theory of rubberlike elasticity, M. L. Huggins, 1
Spectrophotometric determination of the styrene content of butadiene-styrene copolymers, E. J. Meehan, 175
Statistical behavior of the single chain molecule and its relation to the statistical behavior of assemblies consisting of many chain molecules, W. Kuhn and F. Grün, 183
Use of a stopcock device for sampling latex, A. I. Medalia, 245

Sedimentation and Diffusion
Molecular weight averages obtained from sedimentation velocity and diffusion measurements, S. Singer, 445
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22
Sedimentation and diffusion of cellulose molecules, J. J. Hermans, 233

Solutions
Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63
Dependence of solvation on particle shape, B. Jirgensons, 475
Determination of polymer-liquid interaction by swelling measurements, P. M. Doty and H. S. Zable, 90
Investigation of potato proteins, B. Jirgensons, 484
Physicochemical characterization of dispersed chicken feather keratin, W. H. Ward, L. M. High, and H. P. Lundgren, 22

Statistical Mechanics
Dependence of the average transversal on the longitudinal dimensions of statistical coils formed by chain molecules, W. Kuhn, 380
A new approach to the theory of rubberlike elasticity, M. L. Huggins, 1
Statistical behavior of the single chain molecule and its relation to the statistical behavior of assemblies consisting of many chain molecules, W. Kuhn and F. Grün, 183

Textiles
Application of the density-gradient tube in fiber research, Letter to the Editor, S. Tessler, N. T. Woodberry, and H. Mark, 437
Elastic properties of textile yarns, represented with the aid of a mechanical model, H. A. Vreedenberg, 329
Silver dichroism of micellar systems with fibrous structures, A. Frey-Wyssling and O. Wälchli, 266

Viscosity
The Baker-Philippoff equation for cellulose acetate solutions, J. L. Riley, 431
Characterization of cellulose derivatives by solution properties: Plasticizers as solvents, H. M. Spurlin, A. F. Martin, and H. G. Tennent, 63
Dependence of solvation on particle shape, B. Jirgensons, 475
Investigation of potato proteins, B. Jirgensons, 484
Molecular weight averages obtained from sedimentation velocity and diffusion measurements, S. Singer, 445
Relation between molecular weight and intrinsic viscosity for polymethyl methacrylate, J. H. Baxendale, S. Bywater, and M. G. Evans, 237
Theory of rolling plastics. I. Calculation of roll pressure, D. D. Eley, 529
Theory of rolling plastics. II. Thermal effects, D. D. Eley, 535

Vulcanization
The mechanism of reinforcement. Part II, G. Goldfinger, 58
Modern views on the chemistry of vulcanization changes. I. Nature of the reaction between sulfur and olefins, E. H. Farmer and F. W. Shipley, 293
Modern views on the chemistry of vulcanization changes. II. Role of hydrogen sulfide, R. F. Naylor, 305
Modern views on the chemistry of vulcanization changes. III. Reaction of sulfur with squalene and with rubber, G. F. Bloomfield, 312

CONTENTS

Vol. 1, Nos. 1-6, 1946

Journal of Polymer Science

Number 1, January

A New Approach to the Theory of Rubberlike Elasticity
MAURICE L. HUGGINS 1

Mechanism of Peroxide-Initiated Styrene Polymerization. Infrared Absorption of Some Polymer Samples
HARRY F. PFANN, VAN ZANDT WILLIAMS, AND H. MARK 14

Physicochemical Characterization of Dispersed Chicken Feather Keratin
WILFRED H. WARD, LORETTA M. HIGH, AND HAROLD P. LUNDGREN 22

Experimental Study of Copolymerization
T. ALFREY, JR., E. MERZ, AND H. MARK 37

Mechanism of Vinyl Polymerizations. VIII. Introduction of Foreign End Groups
CHARLES C. PRICE AND DAVID H. READ 41

Molecular Processes during Deformation of Rubberlike Elastic Bodies
KURT H. MEYER AND A. J. A. VAN DER WYK 49

The Mechanism of Reinforcement. II
GEORGE GOLDFINGER 58

Number 2, March

Characterization of Cellulose Derivatives by Solution Properties: Plasticizers as Solvents
H. M. SPURLIN, A. F. MARTIN, AND H. G. TENNENT 63

Intramolecular Reactions in Vinyl Polymers as a Means of Investigation of the Propagation Step
E. MERZ, T. ALFREY, JR., AND G. GOLDFINGER 75

Mechanism of Vinyl Polymerizations. IX. Some Factors Affecting Copolymerization
CHARLES C. PRICE 83

Determination of Polymer-Liquid Interaction by Swelling Measurements
PAUL DOTY AND HELEN S. ZABLE 90

Preparation, Purification, and Polymerization of Diethyl Silicon Dichloride
TURNER ALFREY, JR., FRANCIS J. HONN, AND H. MARK 102

Cellulose Acetate Esters Containing Amino Nitrogen
THOMAS S. GARDNER 121

Polymerization of Olefins and Diolefins in Suspension and Emulsion. Part I
W. P. HOHENSTEIN AND H. MARK 127

Review. Studies on Nitrocellulose, Including the Construction of an Osmotic Balance *by* Ingvar Jullander
S. SINGER 146

Am. Assoc. Adv. Sci.—Gibson Island Conferences, Program 147

Number 3, May

Density of Cellulose Fibers. I. Introduction and Experiments on the Penetration of Liquids Into Dry Cellulose
P. H. HERMANS AND D. VERMAAS 149

Density of Cellulose Fibers. II. Density and Refractivity of Model Filaments
P. H. HERMANS, J. J. HERMANS, AND D. VERMAAS 156

Density of Cellulose Fibers. III. Density and Refractivity of Natural Fibers and Rayon
P. H. HERMANS, J. J. HERMANS, AND D. VERMAAS 162

Submicroscopic Structure of Cellulose Gels
A. FREY-WYSSLING AND K. MÜHLETHALER 172

Spectrophotometric Determination of the Styrene Content of Butadiene–Styrene Copolymers
E. J. MEEHAN 175

Statistical Behavior of the Single Chain Molecule and Its Relation to the Statistical Behavior of Assemblies Consisting of Many Chain Molecules
WERNER KUHN AND FRANZ GRÜN 183

Preparation and Properties of Rubberlike High Polymers. I. Polymerization of Dienes and Vinyl Compounds in Bulk
C. KONINGSBERGER AND G. SALOMON 200

The Photochemical Decomposition of Cellulose Acetate-Butyrate
R. L. TICHENOR 217

Elastic Deformation and Molecular Weight in Polyisobutylene
JOHN REHNER, JR. 225

Letter to the Editor. Determination of Catalyst Fragments in Polymers by Absorption in the Ultraviolet
AARON KATCHALSKY AND HARRY WECHSLER 229

Letter to the Editor. Polymerization of Allyl Methacrylate by Means of Ultraviolet Radiation
ELKAN R. BLOUT AND BERTIL E. OSTBERG 230

Review. On the Structure of the Protein Molecule. A Chemical Investigation *by* N. Troensegaard
J. T. EDSALL 232

Number 4, August

Sedimentation and Diffusion of Cellulose Molecules
J. J. HERMANS 233

Relation between Molecular Weight and Intrinsic Viscosity for Polymethyl Methacrylate
J. H. BAXENDALE, S. BYWATER, AND M. G. EVANS 237

Use of a Stopcock Device for Sampling Latex
A. I. MEDALIA 245

Comparison of Ultraviolet Absorption and Chlorine Analysis Methods for Composition of Butadiene-*p*-Chlorostyrene Copolymers
E. J. MEEHAN, T. D. PARKS, AND H. A. LAITINEN 247

Use of Density-Gradient Tube in the Study of High Polymers
R. F. BOYER, R. S. SPENCER, AND R. M. WILEY 249

VOLUME CONTENTS

Technique of Electron-Microscope Investigation of Fiber Surfaces
STANLEY F. KERN 259
Silver Dichroism of Micellar Systems with Fibrous Structures
A. FREY-WYSSLING AND O. WÄLCHLI 266
Sodium-Catalyzed Copolymerization of 1,3-Butadiene and Styrene
C. S. MARVEL, W. J. BAILEY, AND G. E. INSKEEP 275
β-Aminoethoxyl- and β-Cyanoethoxylcellulose Acetates
THOMAS S. GARDNER 289
Modern Views on the Chemistry of Vulcanization Changes. I. Nature of the Reaction between Sulfur and Olefins
E. HAROLD FARMER AND F. W. SHIPLEY 293
Modern Views on the Chemistry of Vulcanization Changes. II. Role of Hydrogen Sulfide
RALPH F. NAYLOR 305
Modern Views on the Chemistry of Vulcanization Changes. III. Reaction of Sulfur with Squalene and with Rubber
GEORGE F. BLOOMFIELD 312
Composition of Butadiene-Styrene Copolymers Prepared by Emulsion Polymerization
E. J. MEEHAN 318

NUMBER 5, OCTOBER

Elastic Properties of Textile Yarns, Represented with the Aid of a Mechanical Model
H. A. VREEDENBERG 329
Determination of Persulfate in Emulsion Polymerization Latices
I. M. KOLTHOFF, L. S. GUSS, D. R. MAY, AND A. I. MEDALIA 340
Preparation and Properties of Rubberlike High Polymers. II. Polymerization of Mixtures in Bulk
C. KONINGSBERGER AND G. SALOMON 353
Preparation and Properties of Rubberlike High Polymers. III. Polymerization of Mixtures in Emulsion
G. SALOMON AND C. KONINGSBERGER 361
Dependence of the Average Transversal on the Longitudinal Dimensions of Statistical Coils Formed by Chain Molecules
WERNER KUHN 380
Deformation Mechanism of Cellulose Gels. I. Present Status of Problem
P. H. HERMANS 389
Deformation Mechanism of Cellulose Gels. II. Course of Crystallite Orientation Compared to That Required by Kratky's Theory
P. H. HERMANS, J. J. HERMANS, D. VERMAAS, AND A. WEIDINGER 393
Reaction of Benzoyl Peroxide with Cyclohexane and Cyclohexene. Contribution to the Mechanism of the Catalyzing Action of Peroxides in the Polymerization of Vinyl Derivatives
P. H. HERMANS AND J. VAN EYK 407
Nature of the Carbonyl Groups in Polyvinyl Alcohol
JOHN T. CLARKE AND ELKAN R. BLOUT 419
Determination of Polystyrene in GR-S Rubber
I. M. KOLTHOFF, T. S. LEE, AND C. W. CARR 429

The Baker-Philippoff Equation for Cellulose Acetate Solutions
JESSE L. RILEY 434

Letter to the Editor. Application of the Density-Gradient Tube in Fiber Research
SAUL TESSLER, N. T. WOODBERRY, AND H. MARK 437

Review. Advancing Fronts in Chemistry. Volume I. High Polymers *by* Sumner B. Twiss
P. J. FLORY 440

NUMBER 6, DECEMBER

New Method for Determination of the Activation Energy for the Gelation of Silicic Acid Solutions
S. S. PENNER 441

Molecular Weight Averages Obtained from Sedimentation Velocity and Diffusion Measurements
SEYMOUR SINGER 445

Reactivity of Monomers in Copolymerization
KENZIE NOZAKI 455

Polymerization of Methyl Methacrylate in Aqueous Emulsions
J. H. BAXENDALE, M. G. EVANS, AND J. K. KILHAM 466

Dependence of Solvation on Particle Shape
B. JIRGENSONS 475

Investigation of Potato Proteins
B. JIRGENSONS 484

Heat Polymerization of Nonconjugated Vegetable Oils
I. M. BERNSTEIN 495

Theory of Rolling Plastics. I. Calculation of Roll Pressure
D. D. ELEY 529

Theory of Rolling Plastics. II. Thermal Effects
D. D. ELEY 535

Water-Soluble Alkoxyacetals of Polyvinyl Alcohol
K. F. BEAL AND C. J. B. THOR 540

Polymerization of Olefins and Diolefins in Suspension and Emulsion. Part II
W. P. HOHENSTEIN AND H. MARK 549

Letter to the Editor. Symbols for Copolymerization
TURNER ALFREY, JR., FRANK R. MAYO, AND FREDERICK T. WALL 581

Review. Advances in Colloid Science. Volume II. Scientific Progress in the Field of Rubber and Synthetic Elastomers *by* H. Mark and G. S. Whitby
A. D. MCLAREN 582

Author Index 583

Subject Index 586
